EXPERIENCE

Artificial Intelligence & Data Specialist
Deloitte

📅 Feb 2022 – Ongoing   📍 AKL, NZ

- Undertaken and/or led a range of projects including machine learning, data & cloud engineering, generative AI, data governance, data visualisation, AWS, ethical AI, data analysis, and data strategy
- Led a team in building a containerised AI-driven data quality tool
- Generative AI project for large insurance company led to handling time reduced by 26% and worker satisfaction increased by 10% - Marah was the lead ML and Data Engineer
- Led 4 well-received Generative AI labs for executives in educating and solutionising Generative AI projects
- Enhanced company/team eminence through published numerous AI/ML blogs and thought leadership pieces, hosted events, and presentations related to ethical AI, risks, data modernisation in the era of AI, ML customer segmentation, MLOps/AIOps, open vs. closed source LLMs, etc
- Committed to learning - completed over 12 certifications/courses.

Strategic Marketing / Junior Business Analyst
Hilti

📅 Aug 2021 – Jan 2022   📍 AKL, NZ

- Project lead redefining customer prioritisation by developing an optimisation programme to mathematically identify the highest potential long-term customers
- Facilitated numerous workshops and training sessions for various teams socialising the newly implemented data management standards

Asset Management Engineer
WSP

📅 Nov 2018 – Nov 2019   📍 AKL, NZ

- Project lead analysing footpath profiles to better identify trips and faults with the goal of reducing hazards and improving footpath comfort for users on wheels
- Assisted in general road engineering projects

ACADEMIC BACKGROUND

BE(Hons) Engineering Science - First Class Honours
University of Auckland

Thesis title: Optimal Experimental Design for Understanding Burn Injuries, A+
Research Project completed: mathematical modelling

BCom Finance and Innovation & Entrepreneurship
University of Auckland

Double major | First in class award
Research Project completed: innovation & entrepreneurship

PERSONAL PROFILE

New Zealand Citizen / Youth Mobility Visa (rights to work in the UK)
Purpose-driven Engineer with a balance of interpersonal and technical skills.

PHILOSOPHY

"Focus on making yourself better, not on thinking you are better."

SKILLS & STRENGTHS

Problem Solving   Project Management
Stakeholder Management   Eye for detail
Analytics   Motivator & Leader
Written & Oral Communication

C++   Python   VBA   SQL   R
AWS SageMaker   Generative AI
CAD   Mathematical Modelling
AWS SageMaker   Machine Learning
Deep Learning   Operations Research
TensorFlow   Uncertainty Quantification
SolidWorks   Tableau   Power BI

ACHIEVEMENTS

aws **AWS ML Certified**
AWS Machine Learning Specialty Certified

aws **AWS Certification**
AWS Certified Solutions Architect & Cloud Practitioner

🏆 **Dean's Honours List**
Achieved by those attaining a GPA of over 8.25 in a given year

VOLUNTEER EXPERIENCE

Finance Director
New Zealand Eid Day

📅 Dec 2020 – Ongoing

- Bi-annual free-to-attend festival attracting over 12,000 people in Auckland, and thousands across Christchurch, Wellington, and Hamilton
- Fundraised over $10,000 in 3 days from the public to support the event
- Managing the finance team in sourcing funds and financial reporting
- Advisor to the Entertainment team
- Co-leading stalls owner & stakeholder management and coordination

Operations Manager
Football For Freedom

📅 Oct 2021 – Ongoing

- Annual non-for-profit football tournament and festival
- Managing operations and logistics
- Stakeholder & vendor management
- Advisor to the Entertainment team

NOTABLE PROJECTS

Speed Management Plan (Land & Transport Engineers)
Wellington City Council

📅 May 2022 – Ongoing

Role: Project Manager, Freelance Contractor
Project valued at over $45m where 97% of Wellington roads require speed limit revision under the newly established "Land Transport Rule: Setting of Speed Limits 2022".
Responsibilities include:

- Development Communications and Engagement Plan that follows best practice framework
- Derived and proposed a mathematical model for prioritising road projects in New Zealand
- Client & Stakeholder management and development of on-going timeline programme via Microsoft Project

MLOps and Operational Controls (Deloitte)
Large Banking Client

📅 Jun 2022 – Oct 2022

The engagement objectives were to implement ML operational controls and Responsible AI guidelines across the bank. The controls were delivered using MLOps principles with model training, algorithm optimisation, hyper-parameter tuning and deployment being orchestrated on the AWS SageMaker platform. Marah played a key role across all project activities as a Machine Learning Engineer and Delivery support for the technical advisory stream.
